

1 MDF PRESS TECHNOLOGY

2 ABSTRACT OF THE DISCLOSURE

3 The invention relates to a method for the production of
4 a construction element manufactured from wood fibers,
5 matchwood and/or sawdust, especially a board, comprising the
6 following steps: adhesive is applied to the wood fibers,
7 matchwood and/or sawdust; the wood fibers, matchwood and/or
8 sawdust provided with adhesive are pressed to form a
9 construction element, especially a board.
